

Network and Application Monitoring Software

Powered by  **viewtinet**

Smart Data Broker

Automatically ingest **ANY TYPE** of data, in **ANY FORMAT**, from **ANY VENDOR** (including WireShark and Splunk).

AI & Forecasting

Predicted System Failures. Advanced Warning Forecasting.

Anomaly Detection

Instantly Identify Anomaly's. Quickly Zoom In on failures. Reduces MTTR from hours to minutes.

PCAP Sniffer

Captures Traffic 24x7. Packet Deduplication.

Multi-Tenant

Real-Time Portal. Customized User Access for specific reports, dashboards, and logs.

Viewtightsight

Viewtightsight is the central element of every Viewtinet installation. It contains the smart analytics GUI, the data base and the configuration pane.

Viewtilog

Viewtilog contains the smart data broker, capable of ingesting data from any source in IT, OT & IoT. It supports SNMP, Netflow, syslog, WMI, API, etc.

Viewtimon

Viewtimon is a DPI probe capable of detecting applications, measuring network KPIs and QoE metrics. Also, it can be deployed as a sniffer that captures all packets 24x7.

Viewtify

Viewtify products optimize the network performance. It can set different QoS policies to the different applications and also optimize the TCP flows.
